

Pediatric Care Center

You have been referred to the EAV Clinic for an Enhanced Asthma Visit! The EAV Clinic is dedicated to providing expert diagnosis and treatment for your child's asthma. We work together with our patients to develop individualized treatment plans to improve quality of life. Your child has been referred due to their history of having asthma or frequent asthma-like symptoms.

This visit will include asthma teaching, spirometry and allergy testing. Your visit will take approximately **1 hour** – please arrive 15 minutes early to the appointment. We will be going over your child's medications so please bring all medications, inhalers, aero chambers, peak flow meters and other asthma equipment that you have. Please **AVOID** taking antihistamines (ex: Benadryl, Claritin, Zyrtec, Allegra) for at least **48 hours** prior to your appointment. Antihistamines can alter allergy skin testing results. Please continue to take all other medications as prescribed including inhalers.

We have included a few questionnaires for you to fill out – please do so ahead of time and bring the papers with you (or you may fax it to 1-877-466-2165 with Attention: Delita, EAV Clinic Coordinator).

In the event that you are unable to keep your appointment please let us know as soon as possible, preferably 24 hours prior to your appointment date.

We look forward to your visit!

Sincerely,

PCC EAV Clinic
